

Outsourcing services

Symm Solutions has proven expertise in delivering successful outsourcing solutions. Successful outsourcing can provide significant cost savings and other benefits.

Symm Solutions have considerable experience in providing tailored outsourcing solutions. We adopt a partnership approach and work closely with our clients to develop a strategy that will meet their business requirements.

Our services range from providing a single software developer to establishing a dedicated offshore development centre.

We have our own software engineering facility in Bangalore, India through which we provide high quality bespoke software development services.

Below are some examples of outsourcing work we have undertaken.

Banking Systems Supplier

We were retained to setup a dedicated offshore development centre for a leading banking systems software house. This entailed handling all aspects of the project from setting up the offshore company, acquiring and furnishing the offices to recruiting and training the initial development, administration and management staff.

Lloyd's Insurance Broker

This insurance broker outsources the development and support of their in-house systems to Symm Solutions. We have developed a number of business applications (for example, a policy administration system) over the years for which we provide ongoing support.

Network Telephony Service Provider

We provide dedicated software developers who work under the guidance of the client's own Project Managers.

Online Restaurant Guides

We were asked to establish a dedicated offshore team to administer the many online guides operated by the company.

Local Authority

We were commissioned to develop an online education portal for this local authority and have since been retained to provide ongoing development and maintenance support.

Our services include:

- Application management
- Business process outsourcing
- Software testing and quality assurance

What we offer:

- Bespoke solutions
- Onshore/offshore capability
- Dedicated teams
- Flexibility and scalability

Contact us today for further information and a no obligation consultation.
