

Solutions for the insurance market

Symm Insure is a powerful web based solution for the Insurance market that enables Brokers and Underwriters to create an online underwriting presence.

Symm Insure provides a complete solution for trading on the internet from the creation of intelligent multi-page insurance forms incorporating complex rating criteria and calculations to generating the necessary documentation and correspondence.

Symm Insure empowers the business user. By putting the business experts in the driving seat, Symm Insure enables the business to bring insurance products to market faster whilst keeping the costs low as there is no dependence on specialist programming skills.

With Symm Insure you get:

- Rapid product development
- Reduced operational costs
- Improved customer service

Features

Symm Insure is feature rich and capable of handling practically all types of insurance products and applications. The versatility of the product enables other business processes (e.g. claims forms) to be brought online.

The extensive security and audit features built into the system also make it an ideal application for extranets and intranets.

Being a web based solution all that is required for deployment is a standard web browser.

- Multi page forms
- Input validations
- Document generation
- Audit
- Security
- Conditional routing
- Calculations
- Emails
- Design flexibility
- Data analysis/export
